

Functional Requirements

ID	Functional Requirement	Priority	Domain
1. User & Access Management			
FR-01	The system shall allow all user types to log in securely using their credentials, with role-based routing to the appropriate system area upon authentication.	High	User & Access
FR-02	The system shall lock a user account after three consecutive failed login attempts and notify the affected user.	High	User & Access
FR-03	The system shall allow customers to manage their own profile including contact details and traveler information, and allow administrators to view customer account details for support and oversight purposes.	High	User & Access
FR-04	The system shall allow administrators to create, edit, disable, and reactivate user accounts and log all such actions.	High	User & Access
FR-05	The system shall allow HR staff to maintain employee records including roles, contact information, and employment status, and to manage attendance entries and leave requests.	High	User & Access
FR-06	The system shall allow users to reset their password through a verified recovery process.	Medium	User & Access
FR-07	The system shall manage user sessions including logout, automatic timeout after inactivity, and prevention of unauthorized session reuse.	Medium	User & Access
2. Travel Package Management			
FR-08	The system shall allow staff to create, update, archive, and publish travel packages, storing details such as destination, duration, itinerary, capacity, price, and inclusions.	High	Package Mgmt
FR-09	The system shall allow staff to define seasonal pricing rules or discounts linked to specific packages and date ranges.	Medium	Package Mgmt
FR-10	The system shall allow staff to create and manage promotional campaigns and promo codes, including validity periods and discount amounts, which the system applies automatically at booking.	Medium	Package Mgmt
FR-11	The system shall allow staff to define and maintain a required travel document checklist for each package.	Medium	Package Mgmt
FR-12	The system shall allow customers to submit package customization requests, which staff can review and respond to manually.	Medium	Package Mgmt
FR-13	The system shall restrict customer-facing package browsing to published packages only, while allowing authorized staff to view and edit packages in any lifecycle state.	Medium	Package Mgmt
FR-14	The system shall allow staff to duplicate an existing package as a template for creating new ones.	Low	Package Mgmt

ID	Functional Requirement	Priority	Domain
3. Booking & Reservation			
FR-15	The system shall allow customers to submit a booking request for a selected package, including traveler details, and shall validate customer travel eligibility before submission is accepted.	High	Booking
FR-16	The system shall route confirmed booking requests to a review queue, generate a unique booking reference, and allow staff to approve, reject, or place the booking on hold.	High	Booking
FR-17	The system shall automatically update remaining package capacity and notify the customer when a booking status changes.	High	Booking
FR-18	The system shall allow staff to issue digital itineraries or travel summaries for confirmed bookings.	Medium	Booking
FR-19	The system shall allow customers to view the current status of their bookings from their account.	Medium	Booking
FR-20	The system shall allow customers to submit cancellation requests subject to policy rules, and require staff to record the cancellation outcome and any associated refund status.	Medium	Booking
FR-21	The system shall allow staff to add notes or special requests to a booking and maintain a history of all major actions performed on that booking.	Medium	Booking
FR-22	The system shall allow staff to modify booking details such as traveler information or travel dates after initial confirmation, subject to availability and policy rules.	Medium	Booking
FR-23	The system shall validate traveler documents against the package checklist requirements before finalizing a booking.	Medium	Booking
FR-24	The system shall allow customers to upload required travel documents against their booking, and shall store those documents for staff review and eligibility verification.	Medium	Booking
FR-25	The system shall allow customers to join a waitlist for a fully booked package, and shall automatically notify the next eligible customer on the waitlist when a confirmed booking is cancelled and capacity becomes available.	Medium	Booking
4. Scheduling & Operations			
FR-26	The system shall allow staff to create and maintain travel schedules including departure dates, return dates, and trip status, linked to their corresponding packages.	High	Scheduling
FR-27	The system shall allow staff to assign guides or coordinators to specific trips from a list of available personnel, and record that assignment against the trip.	Medium	Scheduling
FR-28	The system shall allow staff to mark a trip as completed, triggering archival of operational data including schedules, assignments, and booking records for historical reporting.	Low	Scheduling
FR-29	The system shall distribute required trip-related documents to assigned internal personnel upon trip confirmation or schedule finalization.	Medium	Scheduling
FR-30	The system shall track trip status across its full lifecycle including scheduled, in progress, completed, and archived states, and restrict operations based on current status.	Medium	Scheduling
5. Partner Management			
FR-31		Medium	Partners

ID	Functional Requirement	Priority	Domain
	The system shall allow staff to create, edit, and deactivate business partner records, including partner name, type, contact information, and service category.		
FR-32	The system shall allow staff to link one or more business partners to a travel package, specifying the service role of each partner, and to update or remove those links as needed.	Medium	Partners
FR-33	The system shall maintain a categorized directory of business partners filterable by type and status, available to authorized staff for operational reference.	Medium	Partners
FR-34	The system shall allow staff to record notes or feedback against a business partner record for internal reference.	Low	Partners
6. Financial Management			
FR-35	The system shall allow finance staff to record incoming and outgoing payments and update payment status as unpaid, partial, paid, refunded, or cancelled.	High	Financial
FR-36	The system shall generate receipts automatically upon payment completion and allow authorized finance staff to manually generate or reissue receipts when necessary.	Medium	Financial
FR-37	The system shall allow finance staff to verify and reconcile payment records, identifying and resolving discrepancies between recorded and expected amounts.	Medium	Financial
FR-38	The system shall allow finance staff to record and track refunds and financial adjustments linked to specific bookings, separate from the cancellation workflow.	Medium	Financial
FR-39	The system shall allow finance staff to record agency expenses and generate financial reports including revenue, expense, and profit summaries for specified periods, accessible to managers and owners.	High	Financial
FR-40	The system shall allow finance staff to set and track payment due dates for bookings with partial or pending payment status, flag overdue payments for follow-up, and support the definition of installment schedules with individual due dates for bookings under a payment plan.	Medium	Financial
7. Customer Experience & Loyalty			
FR-41	The system shall allow customers to browse and search travel packages by destination, date, budget, or category, and display current availability alongside search results.	High	Customer Exp.
FR-42	The system shall display a calendar view of available departure dates and remaining capacity for each package, accessible to customers during browsing and booking.	Medium	Customer Exp.
FR-43	The system shall allow customers to save packages to a favourites list for later review.	Low	Customer Exp.
FR-44	The system shall notify customers of promotional campaigns, loyalty rewards, and referral benefits relevant to their account.	Medium	Customer Exp.
FR-45	The system shall record loyalty points earned per booking and allow customers to view and apply available rewards at the time of booking.	Low	Customer Exp.
FR-46	The system shall track customer referrals, link them to associated accounts, and apply any referral benefits upon qualifying booking completion.	Low	Customer Exp.

ID	Functional Requirement	Priority	Domain
FR-47	The system shall maintain a record of notifications and communications sent to each customer, accessible from their account and by authorized staff.	Medium	Customer Exp.
8. Reporting & Analytics			
FR-48	The system shall provide managers and owners with an operations dashboard displaying summaries of active bookings, cancellations, package performance, and sales figures.	Medium	Reporting
FR-49	The system shall provide role-specific reporting views, giving finance staff access to financial summaries, HR staff access to workforce and attendance reports, and managers access to full operational overviews.	Medium	Reporting
FR-50	The system shall allow authorized staff to export reports in a standard format for external business review purposes.	Low	Reporting
FR-51	The system shall log all significant system actions including administrative changes, booking modifications, payment updates, and access events, and make those logs accessible to administrators.	High	Reporting
FR-52	The system shall notify relevant staff members of events requiring their attention, including pending booking reviews, overdue payments, assigned trips, and account changes, routing notifications based on staff role.	Medium	Reporting
